

INTERMEDIATE MEMORY FOR A DIGITAL CAMERA

ABSTRACT OF THE DISCLOSURE

A digital camera system includes an optical system for forming optical images onto an image sensor. The image sensor provides digital images of the optical images to an intermediate memory. A display provides a visual display of selected digital images stored in the intermediate memory. A controller responds to a manual input from a user to initiate long-term storage of selected digital images from the intermediate memory in a long-term memory.

Country	Year	Population (millions)	Urban population (millions)	Urban population (%)	Population density (per sq km)	Urban population density (per sq km)	Population growth rate (%)	Urban population growth rate (%)	Population growth rate (%)	Urban population growth rate (%)
